Why Us?

Color Your Dreams!

About Us

Nilgoon Pigment was founded in 2014 by a group of academic and industrial elites. We started our mission of investing and developing businesses in downstream petrochemical industries by producing a number of cutting-edge products.

In 2017, using our expertise and years of experience in the industry, we started the production of copper phthalocyanine organic nano pigment for the first time in West Asia.

Our Team consists of graduates and young experts who studied at some of the best universities and are constantly trying to improve the quality of our products.

Focusing on the needs of our employees

Considering the demands of our shareholders

Protecting the environment through sustainable actions

Technical Capability, Infrastructure and Commitment to Quality

This capability is a combination of a comprehensive gate-review process in product development; state-of-the-art analytical testing facilities that enable a wide range of investigative methods and a data driven approach; and an application lab that accurately recreates the behavior of our product in our customer's application to provide the optimal solution.

Each year, we invest substantially in R&D and Applications Service to support our customers technically and to extend our range of products to meet our customers' requirements.

Our quality, environment and safety systems are based on and accredited with international standards. Our improvement programs are being driven through 6-sigma methodology.
